

PROCEEDINGS

Edited by Uta Betancourt / Thomas Ackermann

5th Solar Integration Workshop

International Workshop on Integration
of Solar Power into Power Systems

19 - 20 October 2015 | Brussels, Belgium

Giga Sponsors:

Supported by:

Media Partners:

Organizer:

EREF
European Renewable Energies Federation

IMPRINT

Proceedings
of the 5th International Workshop on Integration of Solar Power into Power Systems
published in 2015 by:

Table of Contents

Session 1 – Keynote Session: Large-Scale Solar Power in the European Power System 1

09:00 – 10:50 / 19 October 2015 / Room Galaxy 1+2 / Session chair: Thomas Ackermann
(Energynautics, Germany)

Equipping the Power System for Tomorrow

J. Watson (SolarPower Europe, Belgium)
– Presentation is not part of the proceedings –

Solar Eclipse: a Stress Test for Europe’s Power Grid

T. Döring (SolarPower Europe, Belgium) et. al.
– Presentation is not part of the proceedings –

Results of the EU PVTP Grid Study

P.-J. Alet (CSEM, Switzerland) et. al.
– Presentation is not part of the proceedings –

Session 2A: Large-Scale Integration of Solar Power 3

11:20 – 13:00 / 19 October 2015 / Room Galaxy 1 / Session chair: TBA

Reaching New Solar Heights – Mitigating the Duck Curve in California

D. Lew, M. Schroder, N. Miller, M. Lecar (GE Energy Consulting, USA)

Application of Grid Studies for the Secure and Optimal Utilisation of Variable Renewables in Islands – Study Case in Samoa

J. Gómez, F. Fernández (DigSILENT, Germany), F. Gafaro (IRENA, Germany), F. Perelini (EPC – Electric Power Corporation, Samoa)

Operational Impacts of Operating Reserve Demand Curves on Production Cost and Reliability

I. Krad, E. Ibanez (NREL, USA), E. Ela (EPRI, USA), W. Gao (University of Denver, USA)

Impact of High Levels of Solar Generation on Steady State and Dynamic Behavior of the Transmission System: Case Studies and Lessons Learned

V. Singhvi, P. Pourbeik, J. C. Boemer, A. Tuohy (EPRI, USA)

Session 2B: PV and Distribution Networks 31

11:20 – 12:40 / 19 October 2015 / Room Galaxy 2 / Session chair: TBA

Impact of a 100 % Renewables Strategy on a Distribution Grid in Rhineland-Palatinate

L. Wagner, E. Tröster (Energynautics, Germany), J. Krämer, B. Betz (EWR Netz, Germany)

Testing the Enhanced Functionalities of Commercial PV Inverters Under Realistic Atmospheric and Abnormal Grid Conditions

R. López-Erauskin, T. Geury, A. González, J. Gyselinck (Université Libre de Bruxelles – ULB, Belgium), M. E. Hervás, A. Fabre (GreenWatch, Belgium)

Effectiveness Evaluation of TVR and Reactive Power Compensation in Japanese Distribution Systems with a Large Number of Photovoltaics

A. Moriwaki, T. Tsuji, T. Oyama (Yokohama National University, Japan), S. Uemura (Electric Power Industry, Japan)

Impact of Power Factor Variations on the Voltage Stability Analysis of a Solar Photovoltaic Integrated Power Network

T. P. Cowley (Scottish & Southern Energy Power Distribution, United Kingdom), A. O. Ekwue (Jacobs Engineering|Brunel University, United Kingdom)

Clustering of Photovoltaic Generation for the Consideration of Time Changing Geographical Correlation in Probabilistic Analysis of Low Voltage Distribution Systems

F. Vallée, F. Moutier, V. Klonari, J.-F. Toubeau, Z. De Grève, J. Lobry, F. Lecron (University of Mons, Belgium)

 14:00 – 15:40 / 19 October 2015 / Room Galaxy 1 / Session chair: TBA
Comparative Analysis of Various Configurations for Large PV Power Plants

M. de Prada Gil, J. L. Domínguez-García, L. Trilla, O. Gomis-Bellmunt (Catalonia Institute for Energy Research – IREC, Spain), V. Aga, F. Miquel, M. Shafiee-Khoor (ALSTOM Renewable, Switzerland)

Advanced Active Front-end Rectifier Control for Grid Emulator Application

A. González, Y. Mollet, T. Geury, R. López-Erauskin, J. Gyselincx (Université Libre de Bruxelles – ULB, Belgium)

Proof of Evidence for Solar Plant: Design, Quality and System Operators' Acceptance

T. Gehlhaar, B. Hinzer (DNV GL – Energy, Germany), V. K. Vericherla (DNV GL – Energy, India), M.-K. Schwarz (DNV GL – Energy, Germany)

Integrated Approach for Smart Grid Data Acquisition, Transmission and Evaluation

A. Schmutzer, J. Bogenrieder (Smart Grids – Bavarian Center for Applied Energy Research, Germany), G. Jung (University of Applied Sciences Hof, Germany), P. Luchscheider (Smart Grids – Bavarian Center for Applied Energy Research, Germany), S. Müller (University of Applied Sciences Hof, Germany), R. Schmidt, C. Stegner (Smart Grids – Bavarian Center for Applied Energy Research, Germany), S. Trampler (University of Applied Sciences Hof, Germany)

 14:00 – 15:40 / 19 October 2015 / Room Galaxy 2 / Session chair: TBA
Solar Power Forecasting Trials and Trial Design: Experience from Texas

E. Lannoye, A. Tuohy (EPRI, USA), J. Sharp (Sharply Focused, USA), V. Von Schamm, W. Callender, L. Aguirre (CPS Energy, USA)

Solar Forecasting Improvements for Numerical Weather Prediction of Coastal Stratocumulus Clouds in California

I. Lopez, P. Mathiesen, J. L. Bosch, H. Yang, X. Zhong, J. Kleissl, (University of California, San Diego, USA), R. Fovell (University of California, Los Angeles, USA) B. D'Agostino (San Diego Gas & Electric, USA)

Advanced Cloud Simulations for Improved Dayahead Solar Power Forecasts

J. Schipper, P. Mathiesen (DNV GL – Energy, Germany)

Design and Evaluation of the Distributed Solar Power Production Forecast Component of the Solar and Wind Integrated Forecast Tool (SWIFT)

J. Zack (AWS Truepower, USA), D. Nakafuji, A. Brightbill (Hawaiian Electric Company, USA)

High Resolution Solar Resource Assessment with Sky Imager and Distribution System Simulations

A. Nguyen, P. Ubiratan, K. Murray, J. Kleissl (University of California, San Diego, USA)

 16:00 – 18:00 / 19 October 2015 / Room Galaxy 1 / Session chair: TBA
Analysis of Options for the Future Allocation of PV Farms in South Africa

M. Pöller, M. Obert (M.P.E., Germany), G. Moodley (DIGSILENT Buyisa, South Africa)

A Study on Fluctuation Characteristics of Future Residual Load in Eastern Japan after High-Penetration Wind and Photovoltaic Power Generation

T. Kato, Y. Manabe, T. Funabashi, M. Kurimoto, Y. Suzuoki (Nagoya University, Japan)

Phasor Domain Modelling of Electronically Coupled Generators for System Protection Studies

E. Farantatos (EPRI, USA), T. Kauffmann, U. Karaagac, I. Kocar, J. Mahseredjian (Polytechnique Montréal, Canada)

Probabilistic Swinging Door Algorithm as Applied to Photovoltaic Power Ramping Event Detection

A. Florita, J. Zhang, C. Brancucci Martinez-Anido (NREL, USA), M. Cui (Wuhan University, China), B.-M. Hodge (NREL, USA)

Using Solar Power to Increase Power System Efficiency

A. Pramono Jati, N. Martensen (Energynautics, Germany)

16:00 – 18:00 / 19 October 2015 / Room Galaxy 2 / Session chair: TBA

Ensemble Solar Forecasting Statistical Quantification and Sensitivity Analysis

W.-Y. Cheung, J. Zhang, A. Florita, B.-M. Hodge (NREL, USA), S. Lu, H. F. Hamann (IBM TJ Watson Research Center, USA), Q. Sun, B. Lehman (Northeastern University, USA)

The Benefits of Intraday Solar Irradiance Forecasting to Adjust the Day-ahead Scheduled PV Power

S. Cros, E. Buessler, L. Huet, N. Sébastien, N. Schmutz (Reuniwatt, France)

Spatio-Temporal Models for Photovoltaic Power Short-term Forecasting

X. Ghislain Agoua, R. Girard, G. Kariniotakis (MINES ParisTech, France)

Influence of the Quality of Irradiance Forecasts to the Performance of Forecast Based Control of Grid-connected PV-systems with Storage

H. G. Beyer (University of Agder, Norway), A. G. Imenes (Teknova, Norway)

Methodology to Stochastically Generate Spatially Relevant 1-Minute Resolution Irradiance Time Series from Mean Hourly Weather Data

J. Bright, P. Taylor, R. Crook (University of Leeds, United Kingdom)

An Insolation Forecasting Method by Taguchi's T method

S. Negishi, S. Takayama, A. Ishigame (Osaka Prefecture University, Japan)

Prediction of Solar Power by Using the Extinction Coefficient

I. Mathiasson, O. Carlson (Chalmers University of Technology, Sweden)

08:30 – 09:50 / 20 October 2015 / Room Galaxy 1 / Session chair: TBA

Transient Analysis in Distribution System with FACTS and Photovoltaic Generation Units

Y. Dou, T. Tsuji, T. Oyama (Yokohama National University, Japan)

Speedup of Parallel Computing by Parareal Method in Transient Stability Analysis of Japanese Power System with Photovoltaics

T. Sekine, T. Tsuji, T. Oyama (Yokohama National University, Japan), F. Magoulès (Ecole Centrale Paris, France), K. Uchida (Waseda University, Japan)

A Reactive Power Control Strategy for Preventing Voltage Collapse for Malaysian Power Network with Multiple Photovoltaic Plants

N. B. Salim (Yokohama National University, Japan | Technical University Malaysia Melaka, Malaysia), T. Tsuji, T. Oyama, A. Koide, S. Yamashita (Yokohama National University, Japan), K. Uchida (Waseda University, Japan)

08:30 – 09:50 / 20 October 2015 / Room Galaxy 2 / Session chair: TBA

Importance of Demand Side Flexibility and Management for Large-Scale Variable PV Integration in Urban Environment

J. Salpakari, J. Mikkola, P. Lund (Aalto University, Finland)

Energy Management System for a Photovoltaic System With Battery Storage Participating in Grid Voltage Quality Improvement

I. Ranaweera, O.-M. Midtgård (Norwegian University of Science and Technology, Norway)

Influences of Time Resolution and Recording Period of Energy Consumption on the Assessment of Photovoltaic Battery Systems

M. Hinterstocker, S. von Roon (Research Center for Energy Economics, Germany), D. Berner, C. Bruce-Boye (University of Applied Sciences Lübeck, Germany)

Session 6A: Grid Code Aspects 243

10:10 – 11:25 / 20 October 2015 / Room Galaxy 1 / Session chair: TBA

Recommendation for the Behavior of PV-Systems during Grid Disturbances Depending on their PCC

S. Laudahn, B. Engel (TU Braunschweig, Germany, Germany), T. Bülo, V. Sakschewski, G. Bettenwort, H. Knopf (SMA Solar Technology, Germany)

Impact of Fault-ride through Capabilities of Inverter-based Distributed PV on Voltage and Frequency Performance of the Bulk System

V. Singhvi, J. C. Boemer, P. Pourbeik, A. Tuohy (EPRI, USA)

An Alternative Identification of RMS-Voltage Trajectories based on Real Voltage Dips — Comparison with Grid-Code Requirements

T. García-Sánchez, E. Gómez-Lázaro (University of Castilla-La Mancha, Spain), A. Molina-Garcia (Polytechnical University of Cartagena, Spain)

Session 6B: Economic and Environmental Aspects 263

10:10 – 11:25 / 20 October 2015 / Room Galaxy 2 / Session chair: TBA

Technical-Economical Study of Solar and Wind Power Integration Into the Northern Interconnected System of Chile

P. Valenzuela, R. Gálvez, J. Avalos, C. Leyton, F. Salinas (CDEC-SING, Chile)

CO2 Emission Savings Resulting from Smart Control of Photovoltaics and Heat Pumps in Residential Dwellings and Office Spaces in Belgium

P. Van Dievel, K. De Vos, R. Belmans (KU Leuven, Belgium)

A Road Map to PV Integration Using Economic Complexity Principles

I. R. Smith, S. McMillan (SM Solar & Wind Energy Systems, Trinidad and Tobago)

Session 7: Closing Session - Podiums Discussions 281

11:30 – 12:15 / 20 October 2015 / Room Galaxy 1+2 / Session chair: TBA

Podium discussions

The contributions and discussions of this session are not part of the proceedings.

Poster Presentation Papers 283

Probability Characteristic Fitting for Photovoltaic Output Forecasting Errors and Correlations amongst Different Photovoltaic Power Stations

Y. Yuan, J. Bao (Hohai University, China), X. Zhang (Nantong University, China), J. Zhou, Q. Yang (Hohai University, China)

Workshop Participants 291
